

The Neuro X Postdoctoral Fellowships Program

The Neuro X Institute at EPFL calls for applications to its new **Postdoctoral Fellowship Program**, to carry out innovative research at the crossroads of neuroscience, neuroengineering and neurocomputation, aiming at clinical translation. The program intends to promote young researchers with bold ideas in neurotechnology and provide a ramp towards academic independence. Fellows will be able to carry out their research project within one Neuro X laboratory for up to 24 months (12 months, renewable once).

Applicants should:

- Have fully obtained their PhD at the time of start and no more than 4 years before the application deadline
- Have a background in neuroscience, neuroengineering or computational neurosciences
- Define a research project and identify a Neuro X host lab
- Apply before May 15th, 2024.
